

# Kid Pix Workshop

Naketa Ferguson and Sharon Carlson  
CORE Education Ltd

## Let's get started!!

Click on Kid Pix to start the programme. When the name screen appears enter a username i.e. Naketa.

Kid Pix will always open up with a clean drawing board...

## HELP!!!

Turn this function on then hover over tools; images and Kid Pix will let you know what the tools can do.

Slideshows – each page needs to be saved individually.

# Adding sound

1. Click on the sounds button

2. Click on the microphone

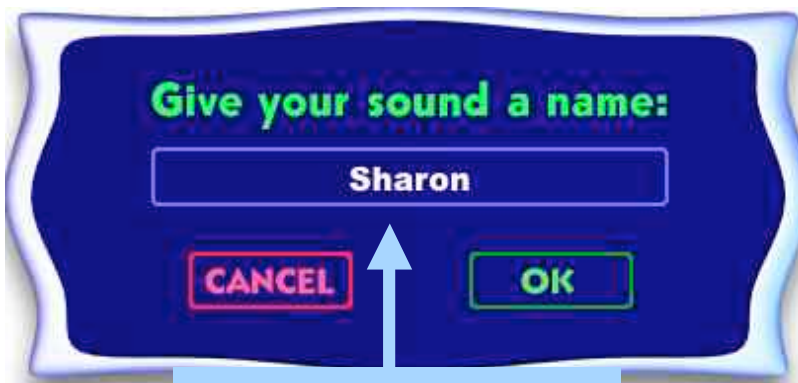

3. Click on the Record button and talk into the microphone

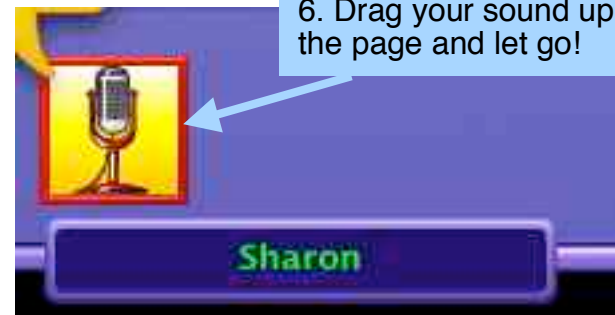

4. Click on the green button to hear your sound

5. When you are happy with your sound, click on the Save button

Type in a name and click OK

6. Drag your sound up onto the page and let go!

# Creating a Kid Pix Slideshow

**One:** Okay! So you've created your fantastic Kid Pix page. You need to save this page in order to use it in your slideshow. You should create several pages for your slideshow.

**Two:** Click on the slideshow icon to create your Kid Pix Slideshow

**Three:** Hover over the screen to reveal the folder icon, click on this folder to find your Kid Pix pages. 'Load' different Kid Pix pages into each slideshow

**Four:** You can 'play', save and print the slideshow

## Customize Slideshow Effects

You can change transition and sound by clicking on the 'movie' icon. This is where you can change the length of each slide as well.

BE SURE TO SAVE YOUR PROJECT REGULARLY!!!!

# Other cool things you can do with Kid Pix
